Final Project

Shao Huang Hsu

01

Use components

# 01 ◆◆ Use components

LED Red/Blue/Green

Relay

Power supply

DS18B20
Fully waterproof temperature sensor
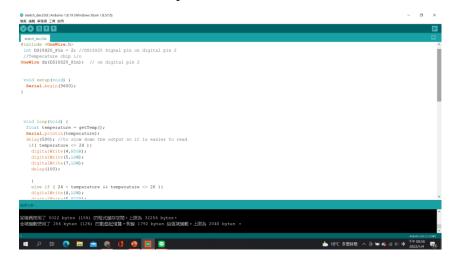

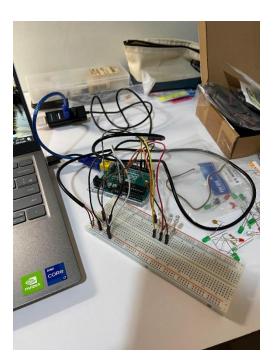

Fan

Breadboard

16mm MCH Ceramic Heater

Have all functions been completed as scheduled?

- Week1, Week2
- Week3, Week4
- Week5, Week6

Difficulties encountered and solutions

- Waterproof temperature sensor will not move ➔ No draft code has been utilized

- Insufficient voltage ➔ Use a relay or a transistor
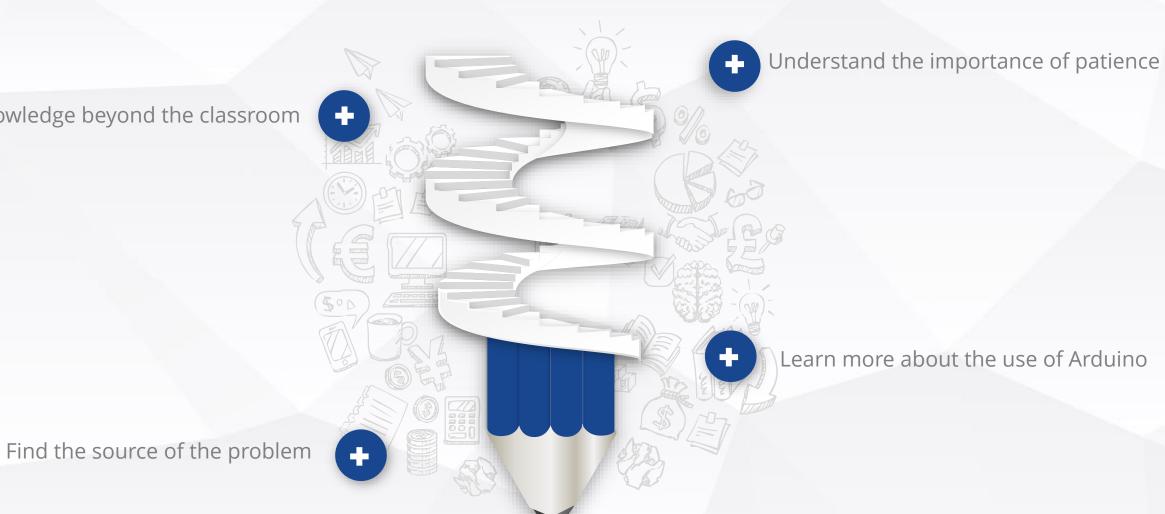

- The relay is not functioning ➔ No relay has been declared

- The refrigeration unit is unable to dissipate heat ➔ Use wind scatter instead
